From: Craig Woolard  
Re: Sabrex System

I just wanted to share a few thoughts with you about the Sabrex EWP system. As you know, we have been working with your systems for the last 18 months in our laboratory at the University Of Alaska Anchorage (UAA) School Of Engineering.

We have been impressed with the quality of the units, their ease of operation and maintenance and the robustness of your product. We've put our units through their paces and they have performed well on a wide variety of challenging water sources.

We continue to believe that your product has great potential to help individual homeowners and water systems solve some chronic and challenging drinking water treatment issues.

Thanks again for the great technical support that you and your company have provided.

Sincerely,

A handwritten signature in black ink, appearing to read 'C.R. Woolard', is written in a cursive style.

Craig. R. Woolard, Ph.D., P.E.
